# Development & Release Management

# Agenda

## Introduction

Mert Yalti and Copado Solutions

## Why Copado?

What are the main SFDC metadata challenges?

How did we solve them?

## Demo

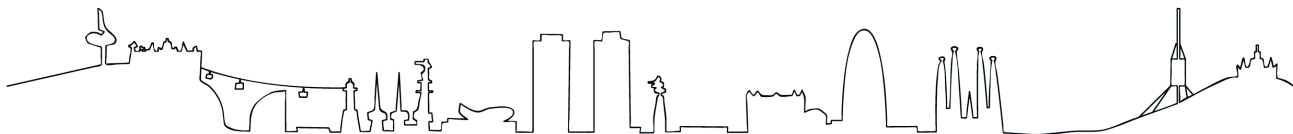

How does Copado work?

What is Salesforce DX and How Copado DX benefits it.

What is the benefit of using Copado?

## Copado v11

What can be expected in the new Copado release?

# Copado Solutions

·Leading provider of Salesforce Release Management solutions.

·Development Lifecycle Solution with Copado DX.

·Manage releases end-to-end aligned with the agile methodology.

·Easy Test Automation.

·Automated compliance checks on Salesforce.

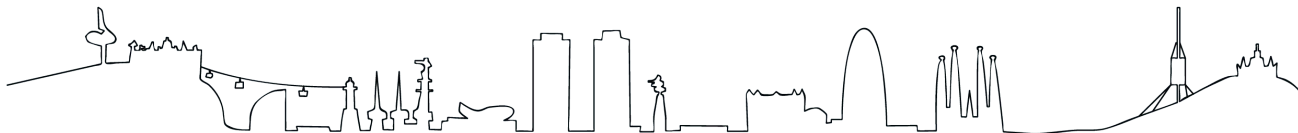

·Customize your Continuous Integration with Salesforce Approvals, Workflows, Triggers & Process Builder.

## Your Best Option

We understand that each sector has its own concerns, which is why Copado adapts to each industry type.

We have a proven track record of enabling a performant, secure, efficient, traceable release process focused on the ROI.

What we do is helping you to carry out releases and deployments. What we want is you to reach your goals sooner.

# Infographic

+ 18,000 Users

+ 100 Customers

5 Continents

**2017**

**6,800,000.00** Copado App page viewed

**210.500** Copado App Sessions

**1,966,967** Metadata Components Deployed

**41,852** Profiles Deployed

**40,566** Apex Tests Run

# Copado Solutions

·We believe features don't add any value in a Sandbox.

·We want Developers and Admins to love building apps on the Salesforce platform.

·We believe people shouldn't work overtime, even during releases.

# Demo

# Copado v11 New Features

Resolve Git merge conflicts  
by using the Copado UI.

## Git Operations

Re-commit  
Destructive Changes  
Undo commits  
Full Profiles & Permission sets

## Automatic release version tagging

Your changes will be tagged  
by release version

## Copado DX

Complete Salesforce  
DX solution in Release  
management process

## Copado Academy Platform

E-learning platform to  
trainings, POCs & certifications

## Vlocity Integration

Commit and deploy Vlocity metadata  
changes just like Salesforce metadata
